

# Viva Espanol! Viva Espanol!

The planet Earth is not as large as it used to be. No, this is not some secret phenomenon that the government has been hiding from the world. It is a simple reality that has been perpetuated by inventions like the airplane, the telephone, the television, and the Internet. Our “backyard” has been extended to reach all corners of the globe. It is for this reason that knowing a second (or third, or forth, etc.) language is of utmost importance.

The Internet is a perfect resource for learning additional languages. There are myriad sites that can offer anything from reference materials like dictionaries to complete works online. The purpose of this Pathfinder is to provide sites for those interested in Spanish. The sites have been divided into four categories: Online Newspapers and Magazines, Reference Materials, Tutorials, and Spanish Literary Journal. A brief summary has been included to facilitate interest. Please assume sites are in Spanish unless otherwise noted.

**Note: The following sites were working as of March 24, 2001. Their availability is not guaranteed past this date.**

## **Online Newspapers and Magazines:**

[www.elpais.es](http://www.elpais.es)
